Motorcycling became popular throuhout the world shortly after the dawn ofthe twentieth century. The first gas-powered motor-cycle was, in fact, invented in 1885 by Gottlieb Daimler, a german engineer. Aside from a leather seat, handlbars, and two wheels it looked very little like today's machines. In America, the Harley-davidson company manufactured its first cycle in 1903, and it wouldn't take an expert bookeeper to trackthe company's success. By 1913, Harley-Davidson was manufacturing over 12,000 cycles annually. Today, ablebodied people everywhere use motorcycles for both recreation and transportation, especially in areas such as Europe where gasoline is more expensive than it is in the United states.
