Words of French Origin

Lesson 28

TIP

Several English words have French roots. For example, the English word porcelain comes from the French word *porcelaine*. The English word surgeon comes from the French word *cirurgien*.

Many other English words have been borrowed directly, in original form, from the French language. Examples include fiancée, bouillon, souvenir, and sauté. The spelling of such words can be tricky. Some, like sauté, contain accent marks. Others contain sounds spelled by letter combinations that are common to French words but rare to English words. For example, the letters **et** at the end of croquet and the **ee** at the end of fiancée stand for the long **a** sound.
